

BUSINESS ADVISORY / TECHNOLOGY / IMPLEMENTATION

Global Experience. Local Impact.

Practical expertise for local businesses ready to attract more customers, work more efficiently, and grow with confidence.

A stronger business starts with the right priorities.

Running a business means juggling customer inquiries, marketing, staff, schedules, paperwork, and daily decisions. Sentient Partners helps simplify the moving parts. We combine sound business judgment with hands-on technical execution, starting with the improvements that matter most.

FOUR WAYS WE CAN HELP

Attract & Convert

Websites, local SEO, Google Ads, online reputation, and targeted outreach.

Help the right customers find you, trust you, and get in touch.

Automate & Communicate

AI voice reception, chat, customer messaging, CRM, booking, and follow-up.

Respond faster without adding another full-time task to your day.

Operate & Scale

Custom apps, estimating, invoicing, field workflows, scheduling, and QuickBooks-connected processes.

Cut duplicate entry and give your team clearer ways to work.

Advise & Grow

Business planning, operational strategy, new-business launches, hiring workflows, and financing-readiness support.

Bring structure and a practical plan to your next stage of growth.

Start with one problem. You do not need to replace everything at once, and you do not need to become a technology expert to get results.

CAPABILITIES IN PRACTICE

What we can put to work for your business.

Each engagement is shaped around your business, budget, existing tools, and priorities. Here are examples of the practical solutions we build and manage.

01 Websites & Local SEO Professional websites, service pages, mobile-friendly contact forms, search visibility, and ongoing hosting and maintenance. <i>Example: a contractor website that makes it easier to request service and turns inquiries into an organized lead list.</i>	02 AI Phone & Voice Assistants Handle routine calls, capture caller details, route inquiries, and offer appointment booking when staff are busy or unavailable. <i>Example: an after-hours caller shares the issue and preferred appointment window for next-day follow-up.</i>
03 AI Chat & Customer Messaging Website chat, SMS, common-question responses, lead qualification, and handoff to a real person when necessary. <i>Example: a new visitor asks about service availability and is guided toward a quote request.</i>	04 CRM & Lead Follow-Up Track new inquiries, sales stages, estimates, reminders, appointments, and follow-up so opportunities stay visible. <i>Example: an unapproved estimate triggers a timely reminder for an employee to follow up.</i>
05 Custom Apps & Business Systems Purpose-built tools for dispatch, field work, schedules, customer histories, forms, estimates, invoices, and administrative workflows. <i>Example: a technician creates an estimate in the field, captures approval, and passes clean information to the office.</i>	06 Workflow & QuickBooks Integration Reduce manual handoffs between forms, calendars, messages, documents, customer records, and accounting systems. <i>Example: approved job information flows into an invoice process without staff retyping the same details.</i>
07 Advertising, Analytics & Reputation Local campaigns, Google Ads support, campaign tracking, Google Business Profile care, review requests, and reply workflows. <i>Example: see which channels generate inquiries and make it easier for satisfied customers to leave a review.</i>	08 Business Strategy & Advisory Operational reviews, business launch planning, process improvement, hiring infrastructure, lender-ready documentation, and SBA coordination support. <i>Example: organize growth priorities, clarify financial documentation, and build a realistic implementation roadmap.</i>

WHO WE WORK WITH

Home services and skilled trades • Cleaning and property services • Professional offices • Fitness and wellness • Retail and hospitality • New and growing businesses

Common challenges: missed inquiries, slow follow-up, disconnected tools, duplicated paperwork, inconsistent reviews, and unclear growth priorities.

Capabilities are illustrative. We recommend and scope solutions only after understanding your existing processes, software, and customers.

WORKING WITH SENTIENT PARTNERS

Experienced perspective. Personal commitment.

Sentient Partners is led by Troy Hill, whose senior executive career included leadership of large, international teams and mission-critical business and technology operations across major industries. He now brings that perspective directly to business owners in Auburn, Placer County, and Greater Sacramento.

A practical way to get started.

You do not need a massive transformation project. Many clients start with a website, a better way to manage inquiries, an improved billing workflow, or help prioritizing what to fix first.

1 Discover

We learn how the business works, where time is lost, and what matters most.

2 Prioritize

We agree on the first improvement, the scope, and how success will be measured.

3 Implement

We build, integrate, test, and train with your team before anything goes live.

4 Improve

We support the solution, refine what needs attention, and build on what works.

ONE ACCOUNTABLE PARTNER

We work across strategy, marketing, customer experience, operations, and technology so improvements reinforce one another. You work directly with a local partner who remains involved after launch, rather than being handed a stack of disconnected tools.

Let's talk about your business.

Schedule a 20-minute introductory conversation. We will discuss your goals and identify a practical place to start.
