Missed-call text-back scripts

So a missed call becomes a conversation.

Send these automatically when a call goes unanswered, or by hand from the business phone. Replace anything in [brackets]. Only text people who called you, and honor any request to stop.

Good habits

KEEP IT HUMAN

Use the business name in the first words so people know who's texting. Ask one question at a time. Only promise a callback time you can keep.

Texting rules vary by place and carrier; check what applies to you before automating. Questions? hello@sentientpartners.ai
